

Cree-Con Construction Inc.

## International Women's Day

Karma Hunter

Cree-Con Construction Inc.

I am part owner of Cree-Con Construction Inc. Along with being an owner I am also a Carpenter by trade, Field Supervisor, Lead Estimator, Office Manager, Project Manager, NCSO, Vice President and CEO,

I have now worked in the Concrete industry for almost 20 years

My favorite part of working in this industry is all the different trades one gets to work with and the relationships I have made over the years. You are always learning ins constrcuton, there is never a day that goes by that I have not learnt something new.

I am a huge advocate for women in the trades and being one of the very first group of women to graduate from Women Building Futures. I try to give back as much as possible, so I talk to each graduating class at WBF to give them insight to the industry as a whole, the truths about being in the trades as a women, the what to do's and don'ts. We also have a woman that works for us as a concrete placer, which is a very rare thing as well.
